
17th International GridKa School 2019 - The Art of Data

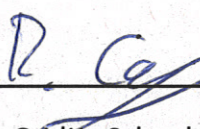

We hereby certify that

Reinaldo Astudillo

has participated in GridKa School from August 26 – August 30, 2019.

The International GridKa School 2019 is one of the leading summer schools for advanced computing techniques in Europe. The school provides a forum for scientists and technology leaders, experts, and novices to facilitate knowledge sharing and information exchange. The target audience is different groups such as graduate and PhD students, advanced users as well as IT administrators. GridKa School is hosted by Steinbuch Centre for Computing (SCC) of Karlsruhe Institute of Technology (KIT).

The topic of this year's school is "The Art of Data". In this context we are excited to have interesting contributions on a wide range of topics regarding "State of the art" programming and modern programming languages, scalable and extensible computing infrastructure for scientific computing and Machine Learning.

A handwritten signature in blue ink, appearing to read "R. Caspart", written over a horizontal line.

GridKa School 2019 General Chair

Dr. René Caspart, Karlsruhe Institute of Technology
